

HaliplaQ

from Halewood Health UK

Disclosing Tablets For Healthy Gums and Clean Teeth

Key Features:

- Quick and simple to use
- Differentiates NEW and OLD plaque

Key Benefits:

- Shows that you have effectively removed plaque
- Improves brushing technique with regular use
- Lowers the risk of plaque build-up which can lead to gum disease

Plaque is a sticky colourless deposit on teeth in which bacteria constantly forms. In order to keep gums and teeth healthy, plaque must be removed frequently and thoroughly.

How HaliplaQ works?

HaliplaQ contains disclosing agent which reveals old and new plaque. The red residual deposits indicate new plaque whilst the blue residual deposits indicate older plaque.

Made in the UK
